# ApplicationXtender Connector

EMC ApplicationXtender Connector enables the seamless integration of business applications to ApplicationXtender—without requiring initial programming or on-going maintenance.

With ApplicationXtender Connector, employees can access information quickly and easily from virtually any business application, including Microsoft Office products, mainframe terminal emulators, and browser-based applications, to make better decisions faster and deliver higher levels of customer service.

EMC ApplicationXtender Connector includes the following features and capabilities:

- Seamlessly integrate ApplicationXtender with any Windows-based business application with no coding required
- Ability to query and view the resulting document list within ApplicationXtender from any Windows-based application
- Ability to ad-hoc import of any document into ApplicationXtender from any Windows-based application
- ApplicationXtender web viewing capabilities to include scanning documents, support for annotations, redactions, and viewing documents without the need for the native applications to be available locally
- Ability to push deployment packages using Microsoft's ClickOnce technology

The ApplicationXtender Connector software will allow accounting staff to access our voucher images from our IFS Financial Software. Staff will click on a warrant number in the IFS system and it will bring up the corresponding scanned voucher. The plan is to expand usage of this software to access other images that are scanned into many of the other programs that we use. This will allow for up to date scanning, less storage and quicker more efficient access.

| Description | Purchase Price | Annual Maintenance and Technical Support Agreement | Total Cost for License |
|---|---|---|---|
| 5 Concurrent User License Pack | $2,500.00 | $600.00 | $3,100.00 |
